

Objectives

To be always updated with last solution , and be able to manage at his full potential , We organize some different training on site at our office located in IMOLA .

We think that this is a necessary starting point to have full control of the system , from installation of a new bike , setup on dyno , setup on track and diagnostic of problems . We think this is mandatory for use the system at 100% of the potential .

The class are small enough (max 8 persons) so You have the chance to interact with speaker with questions , and entering in details also from Your experience .

You can find a complete and updated list of planned events at :

<https://www.mectronik.info/events/>

Participants

The training is designed for Engineers and Technicians , with some basics about motorbike applications . Good know of PC and Windows is mandatory .

Training will be organized in ITALIAN or ENGLISH (please check calendar for more details) .

Participants must be part of an organization , a valid VAT number and company details for invoicing are necessary for booking .

Organization

An early booking is mandatory , compiling online form (please check calendar for link) .

Because of limited participant number (max 8 persons) prepaid submission is necessary

Booking and event You will receive all necessary information to finalize You reservation .

The cost of each training include Launch , Coffe' breaks and Documentation (all document are in English also for Italian language training) .

Location

The training days will be in our training center located in historical center of Imola :

Mectronik

Via Goffredo Mameli , 27
Imola (BO) – Italy
